PLATEPIA.COM

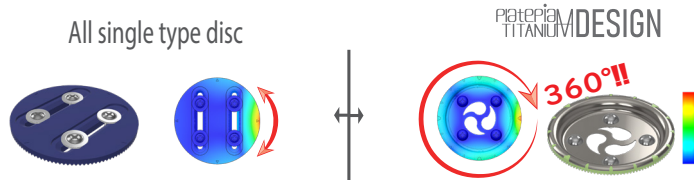

Powerful from the first year of snowboarding.

Special feature "PLATEPIA"

Gear packed with cutting-edge science and technology to reduce fatigue!

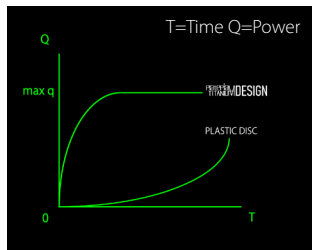

PLATEPIA is a replacement disc that uses the "lever principle" to amplify force in all directions using the center disc as a fulcrum. Computer analysis compares disk differences. I'll explain this along with the rider's performance.

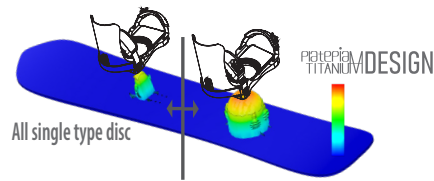

Real snow feel.

Increased force efficiency makes a big difference in feel. A world without time lag.

Suitable for all types of snow from icy artificial snowfall to powder snow.

Comparison of response speed

3D representation of force transmission

Eliminates the problem of structural limitations of existing bindings.

You should now understand the physical advantages of PLATEPIA. We have broken through the structural limits of conventional bindings. Mounting will be even more flexible, and the number of times you have to worry about "angle," "width," and "centering" will be reduced.

You will also have more freedom in your choice of snowboards, and you will see the possibilities.

Floatability and light weight are everything when it comes to enjoying powder snow.

PLATEPIA, like snowshoes, provides buoyancy by transmitting force widely and evenly. This effect improves the maneuverability of the snowboard. Enjoying powder snow will maximize the value of your time. We are the one and only product that lets you feel the snow.

The theory behind snowshoes is that a large ground contact area and even distribution of force prevents sinking underfoot.

Various effects reduce fatigue.

Recommendations from the 2019-2023 all-around set-up.

HPS TAKAHARU NAKAI - SALOMON - with PLATEPIA2.0

PARTY PLATTER -K2- with PLATEPIA1.0-D / K2

PLATEPIA PRO RIDER TAKAHARU NAKAI MODEL

KAZU KOKUBO PRO - CAPITA -

A wide variety of products & Find what you want.

March 2019: Titanium models go on sale

March 2023 Stainless steel model available for speed competitions.

Mounting method

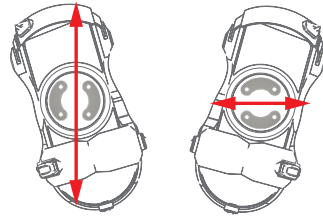

Can be installed with a screwdriver.

STEP ⑤→④→③※→②→①

- ① SCREWSx8
- ② WASHERSx8 (①②SET)
- ③ SELECTIVE SPACERx4※
- ④ PLATEx2
- ⑤ COLOR RINGx2

※Light-weight children and women can be removed.

※Vertical: Improved response performance

※Horizontal: high stability

■ Note on coloring
Adjustable 3 degree. For union binding use, the ring may be difficult to insert. Please push the ring in strongly first and then attach the plate.

■ About PLATE compatibility
If you change binding manufacturer, you can still use the rings by purchasing the corresponding rings (sold separately).

■ Heel-cup size adjustable
The product size depends on the snowboarder's height, on how he or she snowboards, and on the design and make of the snowboards. See the chart.
DRAKE/UNION/SALOMON -The future-

PLATEPIA Complete set all lineup

Signature series

Colored titanium.
Special sticker included.
Same performance as standard product.

PLATEPIA2.0 Takaharu Nakai

PLATEPIA2.0 / 1.0 Paulparisian

PLATEPIA1.0 Kotaro Marumo

PLATEPIA1.0 Kenichi Jimbo

PLATEPIA1.0 Astushi Yamamoto

PLATEPIA1.0/2.0

113g~120g=1set(Except Ti S.SPACER)
Ti S.SPACER=3gx4
lightweight
High repulsion
Fast response
Reduce fatigue

PLATEPIA1.0-SPEED

192g=1set(Including SUS S.SPECER)
SUS S.SPACER=7gx4
Stronger than titanium
Vibration resistance
Stability
Suitable for speed competitions

UNION/FLUX/DRAKE/K2/YONEX

PLATEPIA Lead engineer

Nice to meet you.

My name is TOMOTSUGU AWAKUNI.

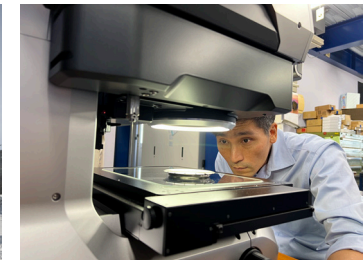

PLATEPIA Lead engineer & Pro snowboarder PSA ASIA(PSA Code 3000363)

I have been snowboarding professionally on the halfpipe since 2000, and this year will be my 24th year.

I have also been skateboarding for 35 years.

Our goal is to create a sustainable society through environmentally friendly manufacturing.

I am a snowboard engineer in Kawasaki, where industry is concentrated.

During my time as an athlete, I was researching ways to improve with less practice.

I have also coached many people. However, I felt that the performance of the equipment had structural limitations. So I thought of making my own disc and succeeded in commercializing it.

Do you think that a disc does not change anything?

PLATEPIA, which has the world's first structure, is difficult for you to understand how it works.

This catalog visualizes our own data by computer analysis and explains the process of achieving the highest performance. We hope that many people will use the plate and continue to enjoy snowboarding in the great outdoors.

PLATE+UTOPIA=PLATEPIA

The name of our product reflects our wish to contribute to the realization of an environmentally friendly and sustainable society. The products are durable and the plates come with a two-year warranty.
